"Gustatory responses of pigs to various natural and artificial compounds known to be sweet in man," D. Glaser, M. Wanner, J.M. Tinti, and C. Nofre, *Food Chemistry*, vol. 68, no. 4, January 10, 2000, pp. 375-85.

Murphy's Laws of Math

Nel risolvere un problema, aiuta sempre conoscerne la soluzione.

The latest authors, like the most ancient, strove to subordinate the phenomena of nature to the laws of mathematics.

Isaac NEWTON

I know not what I appear to the world, but to myself I seem to have been only like a boy playing on the sea-shore, and diverting myself in now and then finding a smoother pebble or a prettier shell, whilst the great ocean of truth lay all undiscovered before me.

Isaac NEWTON

A mathematician's reputation rests on the number of bad proofs he has given.

Abram BESICOVITCH

The proof of the Hilbert Basis Theorem is not mathematics; it is theology.

Camille JORDAN

Mathematics is a game played according to certain simple rules with meaningless marks on paper.

David HILBERT

"It's very good jam," said the Queen.

"Well, I don't want any to-day, at any rate."

"You couldn't have it if you did want it," the Queen said. "The rule is jam tomorrow and jam yesterday but never jam to-day."

"It must come sometimes to "jam to-day," Alice objected."

"No it can't," said the Queen. "It's jam every other day; to-day isn't any other day, you know."

"I don't understand you," said Alice. "It's dreadfully confusing."

"Some Greek data on handedness, hand clasping and arm folding," M. Pelecanos, *Human Biology*, vol. 41, no. 2, May 1969, pp. 275-8.

Murphy's Laws of Math

Un'espressione può essere resa uguale a qualsiasi altra espressione, se la si manipola a sufficienza.

Suppose a contradiction were to be found in the axioms of set theory. Do you seriously believe that a bridge would fall down?

Frank RAMSEY

There is an infinite set a that is not too big.

John VON NEUMANN

There is a tradition of opposition between adherents of induction and of deduction. In my view it would be just as sensible for the two ends of a worm to quarrel.

Alfred WHITEHEAD

Technical skill is mastery of complexity while creativity is mastery of simplicity.

Eric ZEEMAN

Common sense is not really so common.

Antoine ARNAUD

Archimedes will be remembered when Aeschylus is forgotten, because languages die and mathematical ideas do not. "Immortality" may be a silly word, but probably a mathematician has the best chance of whatever it may mean.

Godfrey HARDY

It would be better for the true physics if there were no mathematicians on earth.

Daniel BERNOULLI

Euler calculated without effort, just as men breathe, as eagles sustain themselves in the air.

Dominique ARAGO

Murphy's Laws of Math

Le dimostrazioni non convincono nessuno di nulla.

Geometry is the noblest branch of physics.

William OSGOOD

Modern science, as training the mind to an exact and impartial analysis of facts, is an education specially fitted to promote citizenship.

Karl PEARSON

"The northern ocean is beautiful", said the Orc, "and beautiful the delicate intricacy of the snowflake before it melts and perishes, but such beauties are as nothing to him who delights in numbers, spurning alike the wild irrationality of life and the baffling complexities of nature's laws."

John SYNGE

Common sense is nothing more than a deposit of prejudices laid down in the mind before you reach eighteen.

Albert EINSTEIN

We [he and Halmos] share a philosophy about linear algebra: we think basis-free, we write basis-free, but when the chips are down we close the office door and compute with matrices like fury.

Irving KAPLANSKY

A Mathematician is a machine for turning coffee into theorems.

Paul ERDOS

What we know is not much. What we do not know is immense.

Pierre Simon de LAPLACE

Murphy's Laws of Math

Gli appunti che potete comprendere perfettamente in classe si trasformano in geroglifici a casa.

This paper is so bad it is not even wrong.

Wolfgang PAULI

Mathematics is the science which draws necessary conclusions.

Benjamin PEIRCE

If anybody says he can think about quantum problems without getting giddy, that only shows he has not understood the first thing about them.

Max PLANCK

Mathematicians are born, not made.

Henri POINCARÈ

For Bourbaki, Poincaré was the devil incarnate. For students of chaos and fractals, Poincaré is of course God on Hearth.

Marshall STONE

Any good idea can be stated in fifty words or less.

Stanislaw ULAM

You treat world history as a mathematician does mathematics, in which nothing but laws and formulae exist, no reality, no good and evil, no time, no yesterday, no tomorrow, nothing but an eternal shallow, mathematical present.

Otto Ludwig HESSE

An important scientific innovation rarely makes its way by gradually winning over and converting its opponents: it rarely happens that Saul becomes Paul. What does happen is that its opponents gradually die out, and that the growing generation is familiarised with the ideas from the beginning.

Max Karl Ernst Ludwig PLANCK

Everyone knows what a curve is, until he has studied enough mathematics to become confused through the countless number of possible exceptions.

Felix KLEIN

The fact that the author thinks slowly is not serious, but the fact that he publishes faster than he thinks is inexcusable.

Wolfgang PAULI

Murphy's Laws of Math

I libri di testo sono scritti per coloro che conoscono già l'argomento.

Although this may seem a paradox, all exact science is dominated by the idea of approximation.

Bertrand RUSSELL

Nature is not embarrassed by difficulties of analysis.

Augustin Jean FRESNEL

Now one may ask, "What is mathematics doing in a physics lecture?" We have several possible excuses: first, of course, mathematics is an important tool, but that would only excuse us for giving the formula in two minutes. On the other hand, in theoretical physics we discover that all our laws can be written in mathematical form; and that this has a certain simplicity and beauty about it. But the real reason is that the subject is enjoyable, and although we humans cut nature up in different ways, and we have different courses in different departments, such compartmentalization is really artificial, and we should take our intellectual pleasures where we find them.

Richard Phillips FEYNMAN

To isolate mathematics from the practical demands of the sciences is to invite the sterility of a cow shut away from the bulls.

Pafnutij CHEBYSHEV

Mathematics is very much like poetry. What makes a great poem is that there is a great amount of thought expressed in very few words. In this sense, formulas like $e^{i\pi} + 1 = 0$ are poems.

Lipa BERS

Murphy's Laws of Math

Ogni idea semplice può essere espressa in termini incomprensibili.

It is not certain that everything is uncertain.

Blaise PASCAL

Life is good for only two things, discovering mathematics and teaching mathematics.

Simenon POISSON

[Irrational numbers] is a convenient myth, which simplifies the laws of arithmetic.

Willard Van Orman QUINE

I met a man once who told me that far from believing in the square root of minus one, he didn't believe in minus one. This is at any rate a consistent attitude.

Edward Charles TITCHMARSH

It can be of no practical use to know that π is irrational, but if we can know, it surely would be intolerable not to know.

Edward Charles TITCHMARSH

What I give form to in daylight is only one per cent of what I have seen in darkness.

Maurits Cornelius ESCHER

The more I see of men, the better I like my dog.

Blaise PASCAL

Science is a differential equation. Religion is a boundary condition.

Alan Mathison TURING

In my opinion, a mathematician, in so far as he is a mathematician, needs not preoccupy himself with philosophy - an opinion, moreover, which has been expressed by many philosophers.

Henri LEBESGUE

We can only see a short distance ahead, but we can see plenty there that needs to be done.

Alan TURING

Murphy's Laws of Math

Le risposte che servono non sono al fondo del libro.

[The infinitesimals] neither have nor can have theory; in practise it is a dangerous instrument in the hands of beginners... anticipating, for my part, the judgement of posterity, I would predict that this method will be accused one day, and rightly, of having retarded the progress of the mathematical sciences.

Francois SERVOIS

When working on a problem, I never think about beauty; I think only of how to solve the problem. But when I have finished, if the solution is not beautiful, I know that it is wrong.

Richard Buckminster FULLER

"CEIOSSOTTUU"

Anagram to establish priority in the discovery of elasticity: "Ut tensio, sic vis"

Robert Hooke

A quantity which is increased or decreased by an infinitely small quantity is neither increased nor decreased.

Johann BERNOULLI

Murphy's Laws of Math

Non importa quanto studi per gli esami, non sarà mai abbastanza.

The whole form of mathematical thinking was created by Euler. It is only with the greatest of difficulty that one is able to follow the writings of any author preceding Euler, because it was not yet known how to let the formulas speak for themselves. This art Euler was the first to teach.

Ferdinand RUDIO

There are surely worse things than being wrong, and being dull and pedantic are surely among them.

Mark KAC

This result is too beautiful to be false; it is more important to have beauty in one's equations than to have them fit experiment.

Paul Adrien Maurice DIRAC

And perhaps, posterity will thank me for having shown it that the ancients did not know everything.

Pierre de FERMAT

Cubum autem in duos cubos, aut quadratoquadratum in duos quadrato-quadratos, et generaliter nullam in infinitum ultra quadratum potestatem in duos ejusdem nominis fas est dividere: cujus rei demonstrationem mirabilem sane detexi. Hanc marginis exiguitas non caperet.

Pierre de FERMAT

Newton is, of course, the greatest of all Cambridge professors; he also happens to be the greatest disaster that ever befell not merely Cambridge mathematics in particular, but British mathematical science as a whole.

Murphy's Laws of Math

I problemi che sapete risolvere non escono mai all'esame.

The pragmatist knows that doubt is an art which has to be acquired with difficulty.

Charles Sanders PEIRCE

If only I had the theorem! Then I should find the proofs easily enough.

Bernhard RIEMANN

I believe that proving is not a natural activity for mathematicians.

Rene' THOM

The importance of the "New Mathematics" lies mainly in the fact that it has taught us the difference between the disc and the circle.

Rene' THOM

If it's just turning the crank it's algebra, but if it's got an idea in it, it's topology.

Solomon LEFSCHETZ

This branch of mathematics [Probability] is the only one, I believe, in which good writers frequently get results which are entirely erroneous.

Charles Sanders PEIRCE

We may as well cut out the group theory. That is a subject that will never be of any use in physics.

sir James Hopwood JEANS

If error is corrected whenever it is recognised, the path of error is the path of truth.

Hans REICHENBACH

Murphy's Laws of Math

Il problema che sicuramente non uscirà all'esame, uscirà all'esame.

An expert is a man who has made all the mistakes which can be made in a very narrow field.

Niels BOHR

$2^{30}(2^{31}-1)$ is the greatest perfect number that will ever be discovered, for, as they are merely curious without being useful, it is not likely that any person will attempt to find a number beyond it.

Peter BARLOW

The Council of the Royal Society is a collection of men who elect each other to office and then dine together at the expense of this society to praise each other over wine and give each other medals.

Charles BABBAGE

Unfortunately what is little recognized is that the most worthwhile scientific books are those in which the author clearly indicates what he does not know; for an author most hurts his readers by concealing difficulties.

Evariste GALOIS

It is true that a mathematician who is not also something of a poet will never be a perfect mathematician.

Karl Theodor Wilhelm WEIERSTRASS

Murphy's Laws of Math

La risposta al problema che non siete riusciti a risolvere all'esame sarà evidente in fase di correzione.

A professor is one who can speak on any subject - for precisely fifty minutes.

Norbert WIENER

Logic is the hygiene - the mathematician practices to keep his ideas healthy.

Herrmann WEYL

Of the many forms of false culture, a premature converse with abstractions is perhaps the most likely to prove fatal to the growth of a masculine vigour of intellect.

George BOOLE

A scientist can hardly meet with anything more undesirable than to have the foundations give way just as the work is finished. I was put in this position by a letter from Mr. Bertrand Russell when the work was nearly through the press.

Friedrich Ludwig Gottlob FREGE

The mathematician requires tact and good taste at every step of his work, and he has to learn to trust to his own instinct to distinguish between what is really worthy of his efforts and what is not.

James GLAISHER

The British Mathematical Colloquium consists of three days of mathematics with no dogs and no wives.

John Henry Constantine WHITEHEAD

The modern physicist is a quantum theorist on Monday, Wednesday, and Friday and a student of gravitational relativity theory on Tuesday, Thursday, and Saturday. On Sunday he is neither, but is praying to his God that someone, preferably himself, will find the reconciliation between the two views.

"Eye Damage from Christmas Trees," D.J. Brazier, *Lancet*, vol. 2, no. 8415, December 8, 1984, p. 1335.

Murphy's Laws of Math

Ogni problema è più duro di quanto sembra e richiede più tempo di quanto pensate.

Truth is ever to be found in the simplicity, and not in the multiplicity and confusion of things.

Isaac NEWTON

I am too good for philosophy and not good enough for physics. Mathematics is in between.

George POLYA

Die ganze Zahl schuf der liebe Gott, alles Übrige ist Menschenwerk.

Leopold KRONECKER

The shortest path between two truths in the real domain passes through the complex domain.

Jaques Salomon HADAMARD

Now it is quite clear to me that there are no solid spheres in the heavens, and those that have been devised by authors to save the appearances, exist only in their imagination, for the purpose of permitting the mind to conceive the motion which the heavenly bodies trace in their courses.

Tycho BRAHE

Mathematical discoveries, like springtime violets in the woods, have their season which no human can hasten or retard.

Janos BOLYAI

I believe there are 15 747 724 136 275 002 577
605 653 961 181 555 468 044 717 914 527 116
709 366 231 425 076 185 631 031 296 296
protons in the universe and the same number of electrons.

Arthur EDDINGTON

The Analytical Engine weaves algebraic patterns, just as the Jacquard loom weaves flowers and leaves.

Augusta Ada KING Countess of LOVELACE

An expert is someone who knows some of the worst mistakes that can be made in his subject, and how to avoid them.

Werner Karl HEISENBERG
